TT437KVM

2026 Next-Gen

Long Transmission Range HDMI IP KVM Extender Set, 4k/60Hz up to 200m (Point to Point connection)

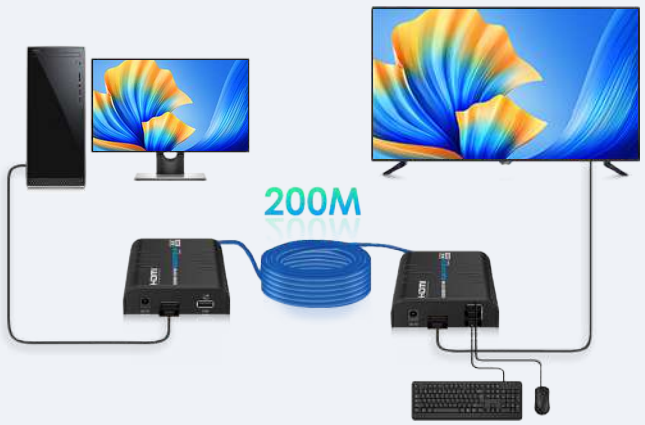

Support KVM and Touch Screen Control

This device transmits a computer's keyboard, video, mouse, and USB signals over the internet, allowing remote control from both ends. Users can operate the computer via a USB console (keyboard/mouse/monitor/touch-screen) while keeping the host in a secure, temperature-controlled location separate from the workstation.

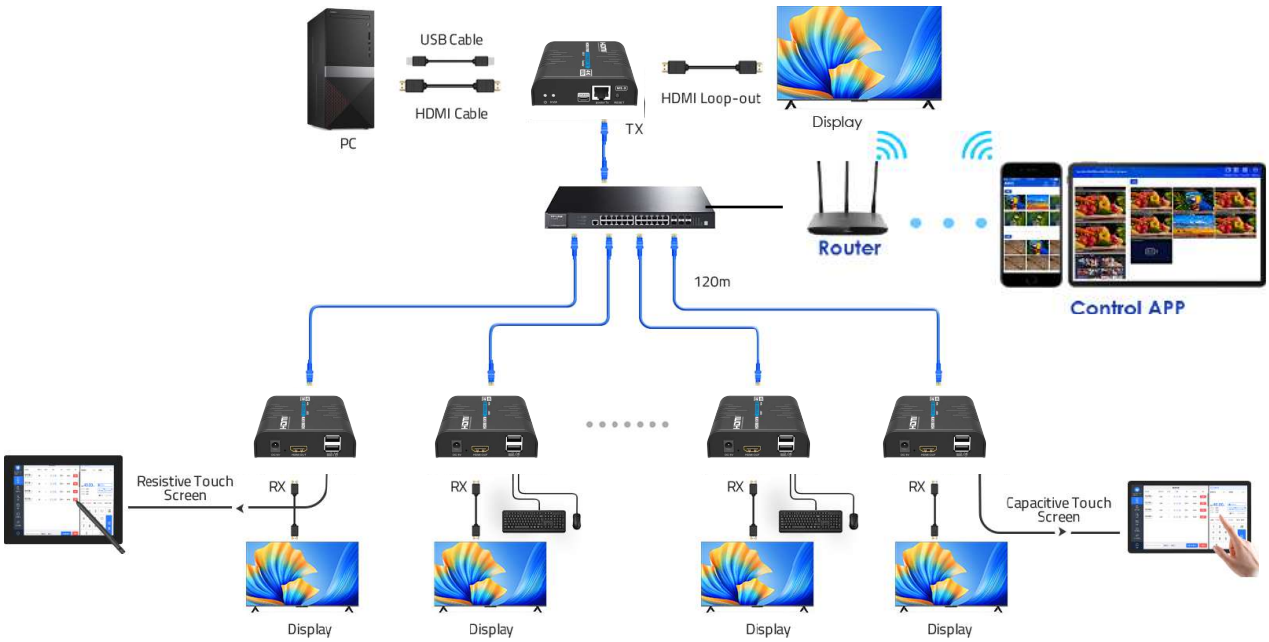

Up to 200M Transmission Range One-to-One

Point-to-Point or One-to-Many Connection
