Car Speakers and Speaker Systems for RAM, Toyota and GM Full-size Trucks

CF CAR AUDIO SPEAKERS KEY FEATURES

ENGINEERED FOR PERFORMANCE	For efficiency and extended high-frequency response, each driver in the CF series features a unique cone and surround material combination. The speakers can be used as individual drivers for flexible system design in active systems.
DMA-OPTIMIZED SPEAKERS	Proprietary motor, suspension and cone modeling systems are used to achieve outstanding linearity, low distortion and stellar sound quality. A flat, linear profile spider promotes linear compliance, while a robust motor structure delivers superior power handling and better overall fidelity at high levels.
ADVANCED FRAME DESIGN	Benefiting from years of design experience, all of the CF midtweeters feature glass-filled, high-temperature polymer frames outfitted with insert-molded terminals and unique frame designs for easy, drop-in installation.
MADE TO FIT	CF component drivers are available in a 6x9" woofer or a 2.75" midtweeter to provide easy, direct installation in a variety of existing OEM interior configurations.
POWERFULLY ADAPTABLE	When powered by an amplifier, CF speaker systems deliver superb sound in a wide range of car audio applications.
