Insert Card for Power

Datasheet

Product Introduction

The Insert Card for Power is made of high-strength aluminum alloy. It supports dry contact protocol and can seamlessly link with devices such as lights and air conditioners. Intelligent power control is realized by inserting a dedicated card, featuring convenient and safe operation. Suitable for scenarios like hotels and office buildings, it helps with energy-saving management and serves as a reliable power solution for modern buildings.

Features

- High-strength aluminum alloy shell, lightweight and durable
- Passive dry contact design
- Guestroom control system integration

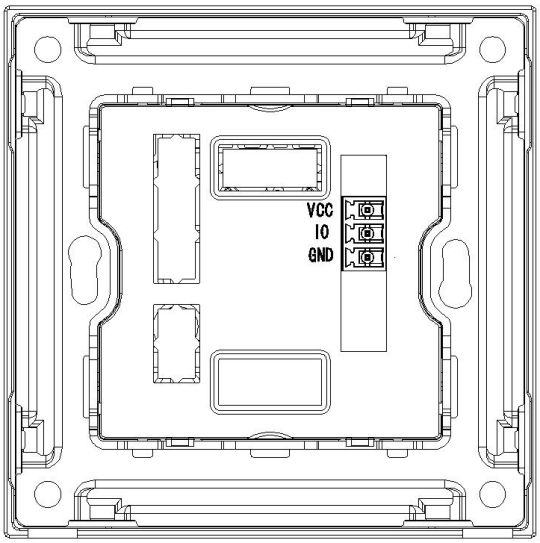

Specification

- Product Model：K1_CARD
- Input Voltage：12V
- Static Power Consumption: ⩽0.2W
- Card Reading Frequency：13.56MHZ
- Service Life：⩾100,000 operations
- Product Size：86×86×25mm
- Working Temperature：-20℃~70℃
- Working Humidity：0~95%
