FitJTP-180J-C104 Dome-base Closure

Mechanical sealing, 48F splicing

FitJTP-180J series are dome-base closures with mechanical sealing, which are designed for all cable application environments such as duct, aerial, and man-hole. FitJTP supports numerous functions as mid-span, branch and direct splice. The closure is accommodated with flexible splice trays and various accessories are available for many scenarios. Rigorous tests are performed to approve the best quality for network reliability.

Features

- Dome-base design structure with mechanical sealing
- High-strength modified polypropylene material
- Mid-span operation without cutting the cable
- Flexible grommets for universal standardized cables
- Ideal fiber management design

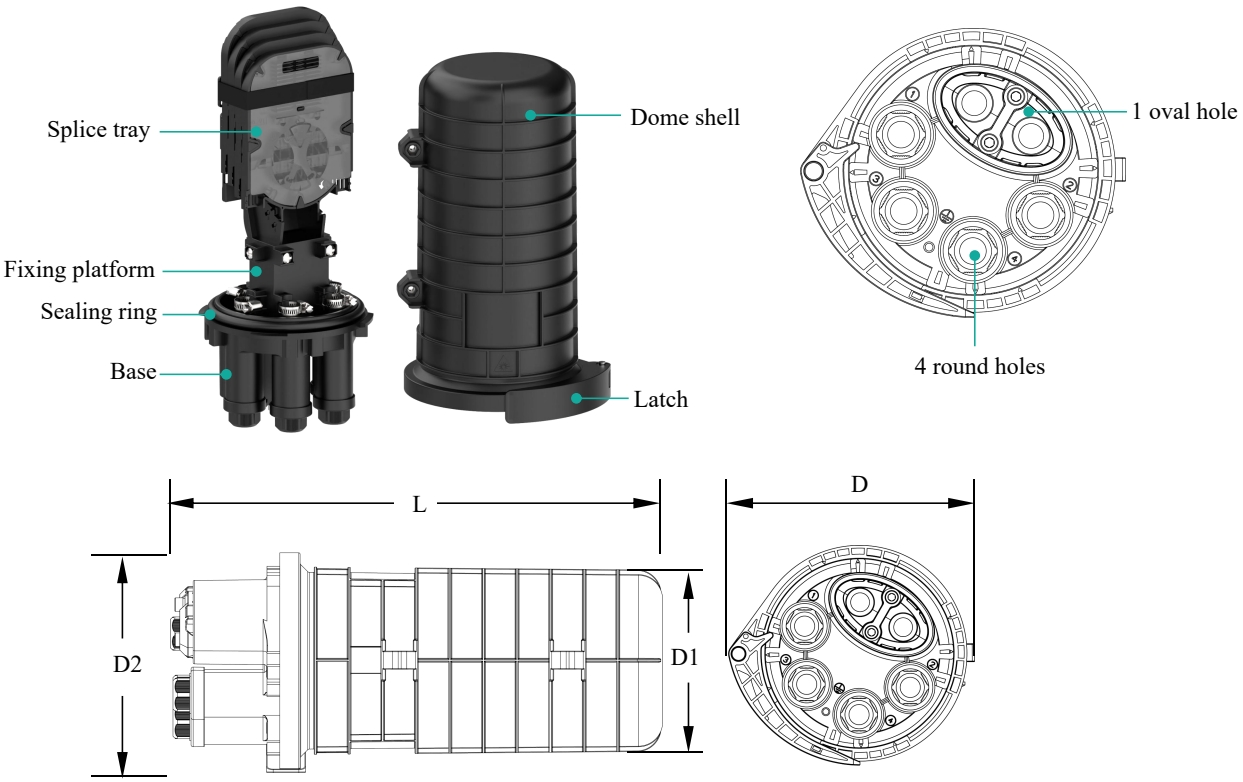

Application

- Outdoor application
- Wall, pole, wire mounting scenarios
